

Beth, John & Family

As we are not in a total lockdown, mummy (me) has had to take on the role of teacher as well as trying to run our house and appointments. Autumn is doing really with her daily schooling, and we are all very proud of her. Emily has found an internship for her game-design study, and is able to do this online. Shannon has been working now and then in Amsterdam at her internship. John been working away. And Niamh had also been doing her online schooling, daily.

My team vegetarian "Peakers" is a proud mypeakchallenge.com (MPC) ambassador. It's been challenging and scary as it's all new to me. But we do what we can to support MPC, Marie Curie, BloodWise (blood cancer) and the Environment Defence fund. My Peak Challenge is a global community rooted in the belief that we can all effect positive change in our lives while helping others."
